

Your Cloud Communications Partner Delivering Solutions Differently.

T2M Works designs solutions made to work specifically for you versus the one-size-fits-all options in the current market. Reduce communications complexity, connect locations and devices, and address your evolving business requirements. No two businesses are the same and neither are the solutions we deliver.

Enterprise collaboration solutions for everywhere work happens. Reliable, scalable, feature-rich platforms. Services for the new normal.

T2M Voice

A fully integrated voice, video and collaboration solution built for work from anywhere.

T2M Connect

A turnkey omnichannel contact center solution built to support agents working from anywhere.

T2M Pro Services

Engineering services to support the planning, design and deployment of T2M Voice and Connect solutions.

T2M Direct Routing

A feature rich and cost-effective service for connecting Microsoft Teams to the PSTN.

Combining the power of Azure and AWS with exceptional engineering – if you can imagine it, we can design and deliver it.

Call Analytics

Gain powerful insights on how your organization communicates with custom reports and visualizations to deliver a better user experience and make more informed business decisions. Increase visibility across your entire data landscape and discover new and innovative uses for that data.

DevOps & Automation

A foundation based on T2M Works and Microsoft best practices to modernize your tools and your platform. Transform your business with improved processes. Benefit from innovative cloud architectures coupled with sound governance.

Application Modernization

Reduce your operating costs and capital spending. Provide better product and services to your customers. Enjoy enhanced security and scalability. Free up your IT team to focus on more strategic initiatives.

T2M Voice2Teams

A complimentary cloud voice solution that pairs well with Microsoft Teams. Offers you an alternative calling plan and a feature-rich telephony experience to address all your enterprise communication needs. Get PSTN access and use the familiar Microsoft Teams soft client or your existing phone.

You do not have to do it alone. Regardless of your enterprise voice strategy, we support it better. We take the responsibility and you take the applause.

T2M Day2

Turn the management and maintenance of your on-premises Skype for Business deployment over to T2M. Experience state-of-the-art monitoring tools, configuration change control, scheduled patching, and proactive trouble alarm resolution.

T2M Engage

Gain predictable financial governance over IT projects with a comprehensive range of engineering expertise delivered in an Engineering as a Service (EaaS) model. Get the benefit of world-class staff augmentation without the full-time commitment as you leverage a “deep bench” of flexibility.

T2M Managed SBC

Put a “security guard” at your IP network border. We’ll protect you from attacks, provide translation between different protocols, and help ensure network traffic efficiency while allowing you to realize the benefits of converged communications.
